

PETRO-CANADA LUBRICANTS OPENS NEW EDMONTON DISTRIBUTION CENTRE

New state-of-the-art facility enhances product supply reliability for Western Canada customers.

Petro-Canada Lubricants, an HF Sinclair brand, is pleased to announce the grand opening of a new, purpose-built distribution centre in Edmonton, Alberta. The new facility is designed to streamline product supply and service for customers across Western Canada.

The new centre integrates advanced shipping, delivery, loading and tank storage processes to provide a seamless, efficient and reliable experience for customers. By strengthening logistics operations, Petro-Canada Lubricants can now provide faster more reliable access to its products, further supporting the needs of businesses in the region.

Equipped with state-of-the-art technology, enhanced protocols and equipment the new centre is designed to protect both employees and customers during product pick-ups - particularly in harsh weather conditions.

“The investment in the Edmonton distribution centre reinforces our commitment to safety, reliability and innovation,” said Tony Conetta, senior vice president of operations, Lubricants & Specialties, HF Sinclair. “We’re excited to provide our customers with a superior level of service and supply chain reliability, enhancing access to the quality products they depend on.”

The opening of the distribution centre was celebrated with a reception on Wednesday, September 18. Customers, distributors and partners were invited to tour the facility and experience the advancements it brings to the Western Canada region.

About HF Sinclair Corporation:

HF Sinclair Corporation, headquartered in Dallas, Texas, is an independent energy company that produces and markets high-value light products such as gasoline, diesel fuel, jet fuel, renewable diesel and other specialty products. HF Sinclair owns and operates refineries located in Kansas, Oklahoma, New Mexico, Wyoming, Washington and Utah. HF Sinclair provides petroleum product and crude oil transportation, terminalling, storage and throughput services to its refineries and the petroleum industry. HF Sinclair markets its refined products principally in the Southwest U.S., the Rocky Mountains extending into the Pacific Northwest and in other neighboring Plains states and supplies high-quality fuels to more than 1,500 branded stations and licenses the use of the Sinclair brand at more than 300 additional locations throughout the country. HF Sinclair produces renewable diesel at two of its facilities in Wyoming and also at its facility in Artesia, New Mexico. In addition, subsidiaries of HF Sinclair produce and market base oils and other specialized lubricants in the U.S., Canada and the Netherlands, and export products to more than 80 countries.

About Petro-Canada Lubricants:

Petro-Canada Lubricants, an HF Sinclair brand, specializes in products and services proven to maximize equipment performance, productivity and overall savings. From heavy-duty engine oils to hydraulic fluids, automatic transmission fluids and gear oils and greases – Petro-Canada Lubricants is committed to delivering innovative solutions that deliver value and keep businesses moving.

About Sonneborn:
