

A PURE ADVANTAGE

Designed to meet the highest beverage industry safety standards, PURITY™ FG food grade fluids and greases protect both your equipment and your bottom line. As a pioneer in the manufacturing of Group II and Group III base oils, we use a severe hydrotreating process to remove impurities that can hinder performance to provide you with superior base oils and specialty fluids.

Our base oils are clear, colorless, odorless and virtually non-toxic—ideal for food applications. The PURITY™ FG line also offers good oxidative resistance and thermal stability, good demulsibility and good biodegradability characteristics.

CONSISTENT PRODUCT
quality for the best performance possible.

WE NEVER
mix poor oil with good and cheapen the final product.

WE ADDITIZE
our own base oil with years of expertise and experience.

INCREASED PRODUCTIVITY
with fewer change-outs

99.9%
crystal-clear, pure oils

PURE EQUIPMENT PERFORMANCE

IMPROVED WATER RESISTANCE

HIGH PERFORMANCE IN EXTREME TEMPERATURES

LOW VOLATILITY TO SUPPORT LONGER EQUIPMENT LIFE

IMPROVE FLUID LIFE:

Perform better with longer-lasting oil and lower operating costs by reducing the frequency of fluid change-outs.

MEET FOOD SAFETY STANDARDS:

Get industrial quality protection that carries a full set of food grade lubricant and grease credentials.

ENHANCE RELIABILITY:

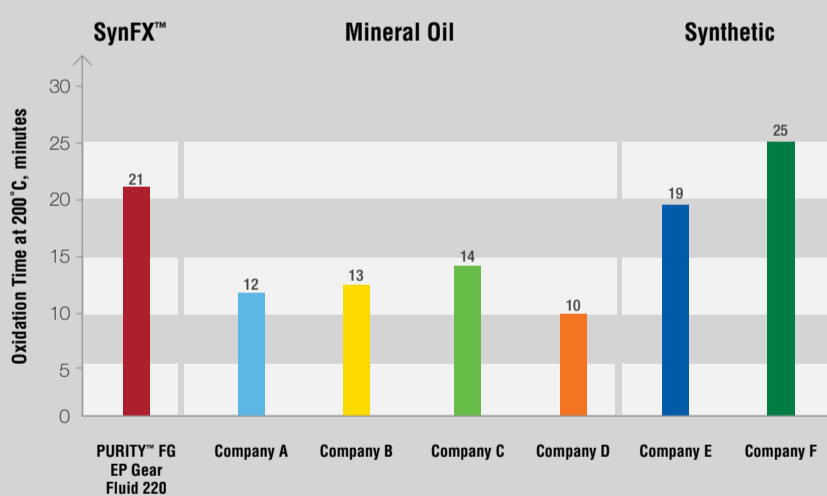

Boost anti-wear protection and cost savings.

EXCEED OPERATIONAL DEMANDS:

Perform well under rigorous operating conditions.

HIGH OXIDATION RESISTANCE

Formulated with patented technology, PURITY™ FG with SynFX™ resists oxidative breakdown up to 2x longer than leading conventional food grade lubricants—and even comparable to some synthetics. PURITY™ FG with SynFX™ ends the compromise between price and performance

PURE BUSINESS RESULTS

INCREASE EFFICIENCY:
Get more done with fewer maintenance interruptions and streamlined inventory.

REDUCE COSTS:
Save money with our high-quality oils.

INCREASE PRODUCTIVITY:
Minimize downtime and production setbacks.

STREAMLINE INVENTORY:
Enhance manufacturing efficiency by using PURITY™ FG across multiple applications.
