

PURITY™ FG food grade fluids and greases have been designed to meet the highest food industry safety standards.

In fact, our products do more than protect your equipment from extreme temperature, contamination and intensive cleaning—they help reduce downtime, streamline inventory and, ultimately, can help save time and money.

Note: These are general guidelines identifying select Petro-Canada Lubricants products that may be most suitable for your equipment. The product list reflects general recommendations only, and does not constitute a final recommendation. Please consult your original equipment manufacturer lubricant requirements for final recommendations. Please contact an HF Sinclair Lubricants & Specialties Technical Services Advisor or visit our website, petrocanadalubricants.com, for more information and our complete product list.
